Water Conservation Notice

PUBLIC ANNOUNCEMENT

1st Notification of Water Conservation

The following is an important message regarding water conservation. The Erie Water Works is requesting that customers scale back slightly on their water usage until further notice.

The Water Works is in the midst of its largest capital improvement project ever undertaken at its primary treatment facility, the Richard S. Wasielewski Water Treatment Plant. As a result, the Erie Water Works is limited to its Chestnut Treatment Plant as the sole source for its water supply.

Due to a combination of unseasonably warm weather, and unexpected delays in the equipment delivery schedule at the Wasielewski Plant, the Erie Water Works is asking its customers to curtail their water consumption by 10% until further notice.

The Erie Water Works greatly appreciates your cooperation in this matter. Please know that the Water Works is doing everything in its power to alleviate this conservation request and return its customers to their normal water usage.

Please refer to the Erie Water Works website at www.eriewater.org for more information and tips on how to conserve water.
